SKILLS

Languages: JavaScript, Python, Java, C#, C++, HTML, CSS

Frameworks & Libraries: Playwright, Selenium, React, Node.js, .NET, Flask, Bootstrap, TailwindCSS

Tools & Platforms: Salesforce, Splunk, Git/GitHub, Maven, AWS, SQL Server, MongoDB, Azure, VS Code

EXPERIENCE

Student Assistant - Information Technology

August 2025 – Present

California Department of Motor Vehicles

Sacramento, CA

- Developed and maintained end-to-end automated test suites for Salesforce-based enterprise systems using Playwright and Selenium, covering multiple business workflows and application processing systems.
- Collaborated with IT Specialists to clarify technical and business requirements to ensure accurate implementation of automated test suites.
- Implemented Playwright automation for multi-step Salesforce enterprise system workflows involving account creation, applications, file uploads, and payments.
- Migrated test automation framework from Selenium to Playwright, refactoring existing scripts and implementing advanced synchronization techniques to improve reliability and reduce flaky test behavior.
- Reviewed and tested teammates' code, provided comprehensive feedback and recommendations in GitHub pull requests, and assisted the team with getting the environment set up.
- Built reusable helper modules for authentication and dynamic data generation to reduce repetitive setup across automated test suites.
- Used Git and GitHub for managing feature branches, version control, code integration, and collaboration through pull requests for shared automation repositories.
- Diagnosed a Playwright configuration issue causing many of the team's headless tests to time out and provided the solutions to fix it.
- Participated in routine meetings, stand-ups, and demos to discuss accomplishments and any technical issues.

Design Hub Intern (IT Focus)

Oct. 2024 – May 2025

American River College

Sacramento, CA

- Digitized a 14-page Department of Student Disability Services form into a responsive web application used by students and counselors, reducing processing time by up to 70%.
- Implemented a full-stack CRUD system with over 100 form fields using .NET and SQL Server.
- Developed user authentication and role-based access control to separate student and counselor permissions.
- Created an admin dashboard for counselors with extended edit and review capabilities.
- Collaborated with IT staff and accessibility stakeholders to meet compliance and usability standards.

Design Hub Intern (Software Focus)

Jan. 2024 – Sep. 2024

American River College

Sacramento, CA

- Built "The Asset Vault," a file management tool using Google Apps Script for organizing project assets.
- Developed a custom web interface with file uploads, data entry, and real-time asset retrieval through dynamic search functionality, using Google Spreadsheet as the backend database.
- Leveraged spreadsheet functions and Apps Script to power structured JSON generation and fast lookup features.
- Created a tool for users to submit Google Sheets and view project timelines via Gantt charts generated from the structured JSON data.
- Presented weekly updates in team meetings to discuss project progress, gather feedback, and plan next steps.

EDUCATION

California State University, Sacramento

August 2025 – Present

Bachelor of Science in Computer Science; GPA: 3.9

Sacramento, CA

American River College

June 2023 – May 2025

Completed Computer Science Coursework; GPA: 3.8

Sacramento, CA

Completed Coursework: Object-Oriented Programming, Algorithmic Design, Basic Data Structures, Structured Programming, Computer Architecture, Discrete Math, Advanced Data Structures and Algorithms

Involvements: NASA Space Apps Challenge, SacHacks
